

# **FIRST GEORGIA DOWSERS NEWSLETTER**

## **JANUARY 2007**

**Happy New Year to All!**

### **January 3<sup>rd</sup> Speaker Topic**

**Sis Sewell, ND**, will be our guest again for the January meeting. Many will recall her fascinating talk back in April of this year about working psychically with animals. This time she will show us how to use our personal numbers to discover what is ahead for us in 2008. Sis has practiced Numerology for 25 years. Some of her clients are business owners who are happy with the results: better bottom line and improved working relationships. She promises to answer all questions from the audience.

**We look forward to having members share their experiences. See you January 3<sup>rd</sup>!**

### **Last Month's Meeting**

We began with merrymaking as it was the annual Christmas party and many members brought a favorite dish. Soon after we held a quick election and the following candidates were elected:

<b>President:</b>	Sandy Norris
<b>Vice President</b>	Cy Jackson
<b>Secretary</b>	Linda Westman
<b>Treasurer</b>	Debbie Winter

### **Volunteer Positions:**

<b>Librarian</b>	Ann Sheffield
<b>Programs</b>	Robin Andrews
	Linda Westman
<b>Training</b>	Bill Hilmes

**Our December speaker, Dr. Millard Deutsch**, spoke about his thirty year involvement with Jacque Fresco and Roxanne Meadows' Venus Project, [www.thevenusproject.com](http://www.thevenusproject.com) and about the documentary film on Jacque Fresco, "Future by Design", [www.fbdthemovie.com](http://www.fbdthemovie.com).

Dr. Deutsch discussed how we have had technology similar to that of Star Trek filtering down to us for a long time and how items today can be designed with quality to last a lifetime. Colonel Phillip Corso claimed in his book "The Day after Roswell" that he personally brought such things as fiber optics, Velcro, integrated circuit micro-chips, and night vision to military contractors to be developed. Dr. Deutsch said that substantial contributions were also made by the Navy, Air Force, Army and intelligence agencies around the world.

Using the technology we already have, we can create a high standard of living for everyone in the world when take the long view and consider ecological and moral guidelines. -As Buckminster Fuller once said: "We need to develop an accounting system that functions '*as if people mattered*'".

Millard said that instead of focusing our attention on the negativity in the world, "why don't we see the world as we actually want it to be?" One of the most profound discoveries of theoretical physics at the end of the 20th century was the truth that "We think reality into existence." This is an idea that has gained acceptance in the book and film, "The Secret". Albert Einstein once said that a mere 10 people could change the world if they could mind-meld and out picture a positive world of the future. - Makes one think, doesn't it?

We encourage those who enjoyed his talk to write to the MacArthur Foundation in Chicago, [www.macfound.org](http://www.macfound.org) and suggest they give Millard a MacArthur Fellows award so that he can afford to give more talks.

Millard sent a Christmas card to the Georgia Dowders thanking us for our gracious hospitality.

## PRODUCTS AVAILABLE FROM FGD MEMBERS:
